Prevent Fires by keeping your oven and stove top clean of any grease

Basic Fire Fighting Equipments Installed and Kept at home

SMOKE DETECTOR

FIRE EXTINGUISHER

FIRE BLANKET

EMERGENCY AND EVACUATION PROCEDURES

WHY EVACUATE?

FIRE

BOMB THREAT

WHAT HAPPEN DURING FIRE /EMERGENCY?

- ❖ The fire alarm will sound.
- ❖ The pressurisation fan will be activated.
- ❖ The electricity supply will be disconnected (Upon arrival of Bomba);
- ❖ Emergency essential supply will be activated to serve the common areas only;
- ❖ All lifts will go down to the Ground Floor and remain stationary.
- ❖ On hearing the alarm, be calm and don't panic.
- ❖ Evacuate the building via staircases and go down to level 1 to exit. Under no circumstances lifts are to be used.
- ❖ Assemble at the assembly point.

EMERGENCY & EVACUATION PROCEDURE

WHAT TO DO IN THE EVENT OF FIRE/EMERGENCY?

- ❖ Break the fire alarm glass;
- ❖ Assess the situation. If the fire is small and manageable, attempt to extinguish the fire by using the nearest fire extinguisher;
- ❖ If the fire cannot be extinguished, contact Jabatan Bomba and Emergency Response Team for assistance immediately. Fire Wardens should not take the risk to extinguish large fires;
- ❖ Exercise the Emergency Evacuation Procedure.

EMERGENCY & EVACUATION PROCEDURE

WHAT YOU SHOULD KNOW ABOUT THE BUILDING

FIRE ESCAPE PLAN

Know the location of all exits on your floor and which route to take in the event of an emergency.

FIRE EXTINGUISHER/HOSE REEL

Know where firefighting equipment's are located. It would be an asset to know how to operate them.

ASSEMBLY POINT

Know the location of the building's assembly point.

FIRE ALARM CALL POINT

Familiarize yourself with the location of the Fire Alarm Point (Break Glass) on your floor.

EMERGENCY & EVACUATION PROCEDURE

WHAT YOU SHOULD KNOW ABOUT THE BUILDING

Fire Alarm Rings

- If the fire alarm rings intermittently remain alert and prepare yourself to evacuate.
- If the fire alarm rings continuously, evacuate and leave the building immediately by the nearest exit staircase downwards.
- Do not attempt to pack your things.
- Do not use the lifts. Use the exit staircase instead.

If You Are Trapped

Do not panic, stay calm and call the Fire Warden or the Firefighting Team via intercom. If smoke is noticed from the gap of your entrance door, close it with wet towels or sheets and wedge these under the door to prevent smoke from entering the room.

Remember!

If you are caught in smoke, take short breaths and crawl to escape, because air circulation nearer the floor is cleaner and less likely to contain poisonous gases.

DO NOT JUMP OUT OF THE BUILDING !!

Keep **Orderly**, keep **calm**, do not panic or rush to come down to evacuate the building.
